Project Design Phase
Problem – Solution Fit Template

Date	15 October 2026
Team ID	----------
Project Name	Car Rental Request Automation in ServiceNow Using Service Catalog and Workflows
Maximum Marks	2 Marks

Problem – Solution Fit Template:

The Problem-Solution Fit simply means that you have found a problem with your customer and that the solution you have realized for it actually solves the customer's problem. It helps entrepreneurs, marketers and corporate innovators identify behavioral patterns and recognize what would work and why

Purpose:

- ❑ Solve complex problems in a way that fits the state of your customers.
- ❑ Succeed faster and increase your solution adoption by tapping into existing mediums and channels of behavior.
- ❑ Sharpen your communication and marketing strategy with the right triggers and messaging.
- ❑ Increase touch-points with your company by finding the right problem-behavior fit and building trust by solving frequent annoyances, or urgent or costly problems.
- ❑ **Understand the existing situation in order to improve it for your target group.**

Template:

1. CUSTOMER SEGMENT(S) Employees who need a rental car for business travel, their managers, the transport / fleet team and ServiceNow administrators.	**6. CUSTOMER CONSTRAINTS** Approval delays, limited car availability, travel deadlines and budget limits, no tracking tool, and the need to follow company travel policy.	**5. AVAILABLE SOLUTIONS** Email or phone requests, spreadsheets and paper forms. Pros: familiar. Cons: no tracking, lost or incomplete details, manual follow-ups, no audit trail.
2. JOBS-TO-BE-DONE / PROBLEMS Request a car quickly with the right details, get manager approval, have a car assigned, and know the status. The transport team must receive clean, complete requests.	**9. PROBLEM ROOT CAUSE** Requests are raised through unstructured channels, approvals are chased manually, there is no central record and no link between request, approval and car availability.	**7. BEHAVIOR** Users email or call the transport desk, follow up repeatedly, and managers approve by reply or verbally. The team re-enters data into spreadsheets to track bookings.
3. TRIGGERS | 4. EMOTIONS: BEFORE / AFTER TRIGGERS: A business trip or client visit comes up, a deadline is near, or a manager asks for travel arrangements. EMOTIONS BEFORE: Frustrated, uncertain, anxious about delays. EMOTIONS AFTER: Confident, in control, satisfied with clear status.	**10. YOUR SOLUTION** A ServiceNow Service Catalog item 'Car Rental Request' with a Flow Designer workflow: Manager Approval, Car Request Approval with availability check, an SCTASK for the Transport Team, notifications at every stage, and a full audit trail. Delivered through an Update Set.	**8. CHANNELS of BEHAVIOR** 8.1 ONLINE: Service Portal catalog form, request tracking page, email notifications and approval links. 8.2 OFFLINE: Calls or walk-ups to the transport desk and verbal approvals, which are replaced by the portal request and logged approval.
